

4SFW FROMM Strappers - StretchFilm Wrappers

The alternative to manual strapping and stretchwrapping:

The **FROMM 4SFW Strapper / Wrapping** solution is the ergonomic solution for those clients suffering a lack of space, and having a constant flow of pallets, which have to be strapped and / or stretchwrapped. The unique concept of this machine offers you both "semi" automatic solutions in one half automatic machine.

For the user who simply needs to strap and wrap pallets quickly, consistently at an affordable price, not yet ready to implement a fully automatic packaging system.

Extra emphasis was placed during the design stage on safety and reliability.

The machine is designed to cope with a high workload.

The use of carefully selected components, keeps easy maintenance to a minimum.

Wrapping specifications:

- Ø1.650mm turning table, chain driven;
- Loading capacity 2.000kg;
- Rotation speed controlled by frequency inverter;
- Exact rotation stop;
- 30 Automatic programs, parameters adjustable;
- 2 motor power pre-stretch system;
- Easy & fast film coil loading;
- Core Ø76mm, film thickness from 9 to 35my;
- Film width 500mm, transparant or colored.

Strapping specifications:

- FROMM PET Head;
- Arch heighth 1.900mm;
- Pallets / Product 1.200 x 800 x 1.800mm, Incl. pallet;
- Cross strapping 2 x 2 / 2 x 0;
- Pattern 500 x 500mm
- Pneumatic head movement, max 750mm;
- End of strap indication on OP;
- Stand. PET coils, for strap from 12,5 to 32mm;
- PET automatic grade;
- Packaging sequence selectable.

Ask your FROMM representative for more information about the FROMM Strappers/Stretchfilm wrappers and all other FROMM products!

4SFW FROMM Strappers - StretchFilm Wrappers

Technical specifications

Machine layout:

Machine details:

- Photocell for pallet height detection;
- Speed controlled by frequency inverter;
- Film overlap can be regulated;
- Easy loading of the pallet, also with trans pallet;
- Easy operating with 1 central cabinet;
- Simple start of the process, pushing one button only;
- Strong industrial design for 3 shift operation;
- Sword stroke 1.700mm.

Machine options:

- Wider, longer & higher pallets on demand;
- Strapping pattern 450mm or 650mm;
- Moving machine, to enlarge strap pattern;
- Light pack detection;
- Emergency lights;
- Jumbo PET coil;
- Film cutting device;
- Remote control;
- Pit option;
- Loading ramp;
- Scale unit;
- Horse shoe table front loading;

Power supply:

- 230 Volt, 50/60Hz, 1,7kW, 7,3A;
- Working conditions + 5° up to + 45°C;
- Air connection 6 Bar, 50NI / Cycle
